

# CLIMATE & HEALTH SCORECARD INITIATIVE 2022-2023

We'd like to thank you for taking part in this initiative.

We are health professionals and researchers in the field of climate activism. We aim to celebrate the progress being made by health organisations in moving towards a just, healthy and sustainable world. This scorecard breaks down climate action into manageable steps across four domains:

INTERNAL  
OPERATIONS

EDUCATION  
& TRAINING

FINANCE

ADVOCACY

We appreciate the questionnaire is lengthy and we thank you in advance for giving your time. We hope that the questionnaire itself may serve as a useful template for climate action, as well as allowing progress to be measured and celebrated. This initiative purposefully sets a high bar for climate action, in line with the rate and scale of action needed to tackle the climate and ecological emergency, so please do not be discouraged if you have not yet met the ambitious targets.

For some questions, we have requested supporting evidence for your answers. We would be very grateful for this information as it helps us better understand your organisation's work and may provide positive examples of climate action, which we can later share (with your consent) to help other organisations to achieve the same.

For this round, we are counting all actions up until December 31st 2022 (unless the question states a specific date range). The deadline for submitting the questionnaire will be 14th April 2023. If you decide not to participate, it would be very helpful to understand why.

Please do contact us with any questions.

Many thanks,

Eleanor & Amelia
